Section II - Exchange Stabilization Fund Fiscal Years 2001 and 2000 Financial Statements

Report of the Office of Inspector General

The Department of the Treasury Office of Inspector General

To the Assistant Secretary for International Affairs:

We audited the Exchange Stabilization Fund's (ESF) Statements of Financial Position as of September 30, 2001 and 2000, and the related Statements of Income and Retained Earnings, and Cash Flows for the years then ended.

Results in Brief

Our opinion on ESF's Fiscal Years 2001 and 2000 financial statements is unqualified. Our audit disclosed the following matters involving the internal control and its operation that we consider to be reportable conditions:

- Supervisory Review and Approval of Transactions Recorded in the General Ledger Need to be Consistently Performed (Repeat Condition).
- Detailed Written Procedures Documenting Accounting Operations and the Financial Statement Preparation Process Need to be Established (Repeat Condition).

Our audit disclosed no reportable instances of noncompliance with laws and regulations.

Management's Responsibilities

Management is responsible for:

- Preparing the financial statements in conformity with accounting principles generally accepted in the United States of America as published by the Financial Accounting Standards Board and for preparing the Policy and Operations Statements of ESF.
- Establishing and maintaining internal control. In fulfilling this
 responsibility, estimates and judgments by management are
 required to assess the benefits and related costs of internal
 accounting policies and procedures.
- Complying with laws and regulations applicable to ESF.

Scope of Audits

We conducted our audits in accordance with auditing standards generally accepted in the United States of America, the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States; and Office of Management and Budget (OMB) Bulletin No. 01–02, Audit Requirements for Federal Financial Statements (OMB Bulletin No. 01–02). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates, as well as evaluating the overall financial statement presentation. Our responsibility is to express an opinion on the financial statements based on our audits. We believe that our audits provide a reasonable basis for our opinion.

In planning and conducting our audit of ESF's financial statements for the year ended September 30, 2001, we considered its internal

control over financial reporting and compliance with laws and regulations. Specifically, we obtained an understanding of the design of ESF's internal controls, determined whether these internal controls had been placed in operation, assessed control risk, and performed tests of controls in order to determine our auditing procedures for the purpose of expressing our opinion on the financial statements and not to provide assurance on the internal control over financial reporting and compliance with laws and regulations. Consequently, we do not provide an opinion on such controls.

As part of obtaining reasonable assurance about whether the financial statements are free of material misstatement, we performed tests of ESF's compliance with certain provisions of laws and regulations, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. Providing an opinion on compliance with laws and regulations was not an objective of our audit and, accordingly, we do not express such an opinion.

We have read the information in the Policy and Operations Statements and assessed whether such information, or the manner of its presentation, is materially inconsistent with the information, or the manner of its presentation, in the financial statements.

Results of Audits

Opinion on the Financial Statements

In our opinion, the financial statements present fairly, in all material respects the financial position of ESF as of September 30, 2001 and 2000, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

Our audits were conducted for the purpose of expressing an opinion on ESF's Fiscal Years 2001 and 2000 financial statements referred to above. The information contained in the Policy and

Operations Statements of ESF is presented for the purpose of additional analysis and is not a required part of the financial statements. Such information has not been subjected to the auditing procedures applied in the audit of the financial statements, and accordingly, we express no opinion on it. However, we compared this information for consistency with the financial statements and, based on this limited work, we found no material inconsistencies.

Internal Control

Internal control is a process, effected by management and other personnel, designed to provide reasonable assurance that the following objectives are met:

- Reliability of financial reporting transactions are properly recorded, processed, and summarized to permit the preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America as published by the Financial Accounting Standards Board, and the safeguarding of assets against loss from unauthorized acquisition, use, or disposition; and
- Compliance with applicable laws and regulations that could have a direct and material effect on the financial statements.

Because of limitations inherent in any internal control, errors or fraud may occur and not be detected. Also, projection of any evaluation of internal control to future periods is subject to the risk that internal control may become inadequate because of changes in conditions or that the effectiveness of the design and operation of policies and procedures may deteriorate.

As defined in OMB Bulletin No. 01-02, reportable conditions are matters coming to our attention that, in our judgment, should be communicated because they represent significant deficiencies in the design or operation of the internal control, that could adversely affect ESF management's ability to meet the internal control objectives as defined above. Material weaknesses are reportable

conditions in which the design or operation of the internal control does not reduce to a relatively low level the risk that errors, fraud, or noncompliance in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions.

We identified the following matters involving the internal control and its operation that we consider to be reportable conditions as defined above.

Reportable Conditions

1. Supervisory Review and Approval of Transactions Recorded in the General Ledger Need to be Consistently Performed (Repeat Condition)

ESF management requires supervisory review and approval of batch runs of transactions before they are posted to the general ledger, to prevent mispostings. We noted in our audit that supervisory review of batch runs from October 2000 through September 2001 transactions was not performed on a consistent basis and approvals were not documented for the reviews that were performed. This lack of consistent review allowed a number of inaccurate entries to be recorded in the general ledger without detection. Specifically, we noted errors in the calculations of quarterly International Monetary Fund remunerations and monthly Special Drawing Rights and foreign currency denominated assets interest accrual due to the use of incorrect exchange rates.

Recommendation

The Director, Office of Financial Management, should ensure that batch runs of transactions and adjustments are consistently reviewed and approved by a supervisor before they are posted to the general ledger. This review should include examining supporting documentation and calculations to support these entries.

2. Detailed Written Procedures Documenting Accounting Operations and the Financial Statement Preparation Process Need to be Established (Repeat Condition)

ESF needs complete and updated written procedures detailing how to process Special Drawing Rights and investment transactions, perform monthly and year-end closing, and prepare their financial statements. Complete and updated written procedures could have prevented errors in the processing of these transactions and the need for us to provide assistance in the preparation of the financial statements. During FY 2001, ESF made some progress towards documenting certain accounting procedures. However, without complete and updated written procedures, transactions may not be processed and reported accurately, consistently, or timely.

Recommendation:

The Director, Office of Financial Management, should ensure that ESF's management establishes complete written procedures detailing the process for recording all transactions, performing month and year-end closing, and preparing financial statements.

* * * * * *

Our consideration of the internal control would not necessarily disclose all matters in the internal control that might be reportable conditions and, accordingly, would not necessarily disclose all reportable conditions that are also considered to be material weaknesses. However, we do not believe the reportable conditions described above are material weaknesses.

Compliance with Laws and Regulations

The results of our tests of compliance in Fiscal Year 2001 with laws and regulations disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*, and OMB Bulletin No. 01-02.

* * * * * *

We have reviewed our findings and recommendations with ESF's financial management and have incorporated their comments as appropriate. Based on mutual agreement, we are issuing this report as final. In accordance with Department of the Treasury Directive No. 40-01, we request a corrective action plan be provided to us within 30 days of the date of this report. We recognize that certain corrective actions have already been undertaken. We encourage these efforts and will continue to provide advice and assistance to you in this regard.

Should you or your staff have any questions, you may contact me at (202) 927-5430 or a member of your staff may contact Mike Fitzgerald, Director, Financial Audits, at (202) 927-5789. We appreciate the cooperation and the courtesy extended to our staff.

This report is intended solely for the information and use of the management of ESF, the Department of the Treasury, OMB, and the Congress, and is not intended to be and should not be used by anyone other than these specified parties.

Exchange Stabilization Fund Policy and Operations Statements Fiscal Year 2001

The Nature and Function of the Exchange Stabilization Fund

The Gold Reserve Act of 1934 established a fund to be operated by the Secretary of the Treasury, with the approval of the President. Section 10 of the Act provided that "For the purpose of stabilizing the exchange value of the dollar, the Secretary of the Treasury, with the approval of the President, directly or through such agencies as he may designate, is authorized, for the account of the fund established in this section, to deal in gold and foreign exchange and such other instruments of credit and securities as he may deem necessary to carry out the purpose of this section." To this end, the Congress, in 1934, appropriated to the Exchange Stabilization Fund (ESF) the sum of \$2 billion out of the increment resulting from the reduction in the "weight of the gold dollar." Subsequent amendments to the Gold Reserve Act approved the operation of the ESF through June 30, 1945. Section 7 of the Bretton Woods Agreements Acts, approved July 31, 1945, continued its operations permanently.

The Bretton Woods Agreements Act also directed the Secretary of the Treasury to pay \$1.8 billion from the ESF to the International Monetary Fund (IMF), for the initial U.S. quota subscription in the IMF, thereby reducing the ESF's appropriated capital to \$200 million.

Reflecting termination of the fixed exchange rate system, legislation enacted in 1976 (P.L. 94-564, effective April 1, 1978, the date of entry into force of the Second Amendment of the IMF Articles of Agreement) amended the language of Section 10 of the Gold Reserve Act to specify that the ESF is to be utilized as the Secretary "may deem necessary to and consistent with the United States obligations in the International Monetary Fund." In 1977, P.L. 95-147 further amended Section 10 of the Gold Reserve Act. Following codification, Section 10 now provides as follows:

Consistent with the obligations of the Government in the International Monetary Fund on orderly exchange arrangements and a stable system of exchange rates, the Secretary or an agency designated by the Secretary, with the approval of the President, may deal in gold, foreign exchange, and other instruments of credit and securities the Secretary considers necessary. However, a loan or credit to a foreign entity or government of a foreign country may be made for more than 6 months in a 12-month period only if the President gives Congress a written statement that unique or emergency circumstances require the loan or credit be for more than 6 months (31 U.S.C. 5302 (b)).

Pursuant to the Special Drawing Rights Act of 1968 (P.L. 90-349, amended by P.L. 94-564, which was approved October 18, 1976 and became effective April 1, 1978), Special Drawing Rights (SDRs) allocated by the IMF to the United States or otherwise acquired by the United States are resources of the ESF.

Section 286p of Title 22 of the United States Code allows for SDRs to be monetized/demonetized through the issuance/redemption by the Secretary of the Treasury of SDR certificates to the Federal Reserve Banks in exchange for dollars. The total amount of SDR certificates outstanding cannot exceed the dollar equivalent of ESF (i.e., U.S.) holdings of SDRs; such certificates are a liability of the ESF.

Foreign Currency Operations

During fiscal year 2001, the ESF engaged in no market transactions.

a. <u>Euros</u>

The ESF had a net valuation gain of \$118.1 million and interest earnings of \$321.4 million equivalent on its euro assets.

b. Japanese yen

The ESF had a net valuation loss of \$761.5 million and interest earnings of \$41.8 million equivalent on its yen assets.

c. Mexico

In December, after the end of fiscal year 2001, the Treasury and Federal Reserve Bank of New York renewed the Exchange Stabilization Agreement with Mexico for another year to December 2002.

SDR Operations

ESF holdings of SDRs increased by SDR 522.5 million during fiscal year 2001 to SDR 8.5 billion. The dollar value of these SDR holdings increased by \$602.9 million, a difference that is due both to the net change in SDRs and a change in the value of the SDR in dollars, a figure calculated by the IMF. The ESF reimbursed the Treasury's General Fund \$491.7 million for SDRs received from the IMF as remuneration on the U.S. reserve position in the IMF. The ESF earned interest of \$422.5 million equivalent on its SDR holdings.

As of September 30, 2001, cumulative allocations to (liabilities of) the United States totaled SDR 4.9 billion (\$ 6.3 billion). These liabilities would come due only in the event of liquidation of, or U.S. withdrawal from, the SDR Department of the IMF, or cancellation of SDRs. As of September 30, 2001, U.S. holdings (assets) of SDRs totaled SDR 8.5 billion (\$10.9 billion equivalent).

The ESF redeemed \$1 billion of SDR certificates from the Federal Reserve in fiscal year 2001, leaving \$2.2 billion of SDR certificates outstanding at the end of the fiscal year.

Income and Expense

Interest revenue totaled \$1.3 billion, consisting of \$509.7 million in interest on dollar holdings invested in U.S. Government securities, \$422.5 million equivalent in interest on SDR holdings, and \$363.2 million in interest on foreign currency investment.

Interest expense totaled \$255.9 million, of which \$251.8 million was in charges of SDR Allocations and \$4.1 million was interest paid by the ESF to the Treasury General Fund on the dollar counterpart of SDRs received as remuneration on the U.S. reserve position in the IMF.

NOTES TO THE FINANCIAL STATEMENTS

Note 1. Summary of Significant Accounting Policies

The Exchange Stabilization Fund (ESF) was established as a result of the Gold Reserve Act of 1934, as amended, to be operated by the Secretary of the Treasury, with the approval of the President, consistent with the obligations of the U.S. Government in the International Monetary Fund (IMF) on orderly exchange arrangements and a stable system of exchange rates. To this end, the Secretary of the Treasury may deal in gold, foreign exchange, and other instruments of credit and securities.

A. Basis of Accounting & Presentation

The ESF has historically prepared its financial statements in accordance with generally accepted accounting principles, based on accounting standards issued by the Financial Accounting Standards Board (FASB), the private-sector standards-setting body. The Federal Accounting Standards Advisory Board (FASAB) was designated by the American Institute of Certified Public Accountants (AICPA) as the standards-setting body for financial statements of federal government entities, with respect to the establishment of generally accepted accounting principles. FASAB has indicated, however, that financial statements prepared based upon accounting standards published by the FASB may also be regarded as in accordance with generally accepted accounting principles for those federal entities, such as the ESF, that have issued financial statements based upon FASB accounting standards in the past. Accordingly, consistent with historical reporting, the ESF financial statements are presented in accordance with accounting standards published by the FASB.

In accordance with generally accepted accounting principles, the preparation of financial statements requires the use of management estimates. Certain immaterial reclassifications have been made to the 2000 financial statements to conform to the presentation used in 2001.

B. Fair Values of Financial Instruments

Cash and Cash Equivalents, which consist of U.S. Government securities and Foreign Currency Denominated Assets (FCDA), are reported in the Statement of Financial Position at amounts that approximate their fair values. The fair value of Investment Securities is based upon quoted market prices (See Note 5). FCDA, Other FCDAs, Special Drawing Right (SDR) Holdings, and SDR Allocations have been revalued in the Statement of Financial Position, using current exchange rates, to amounts which approximate fair value. The SDR Certificates issued to Federal Reserve Banks (FRB) are reflected on the Statement of Financial Position at their face value. It is not practicable to estimate the fair value of these Certificates issued to FRBs since these Certificates contain no specific terms of repayment.

ESF enters into guarantee agreements which represent commitments by Treasury with lenders and/or investors that provide for repayment of all or part of the principal and/or interest on certain debt obligations of a borrower and /or issuer. The ESF is exposed to credit risk on guarantees in the event that it has to honor a guarantee and is unable to recover from the borrower the amounts advanced under the guarantee. It is not practicable to estimate the fair value of these guarantee

Note 1. Summary of Significant Accounting Policies (continued)

agreements because no similar agreements that have comparable credit risk could be readily identified and excessive costs would be incurred to estimate the fair value of these guarantee agreements.

C. Translation of Foreign Currency Denominated Assets and Liabilities

In accordance with Statement of Financial Accounting Standards (SFAS) No. 52, "Foreign Currency Translation, FCDA and liabilities are revalued daily to reflect current exchange rates in effect as of the reporting date. The gains or losses resulting from changes in exchange rates are reported separately in the Statement of Income and Retained Earnings.

D. U.S. Government Securities

ESF invests dollars in excess of its immediate needs in overnight, non-marketable U.S. Government securities issued by the Treasury. The interest rate paid on the investments is the overnight repurchase agreement rate as established by the Bureau of Public Debt.

Note 2. Cash and Cash Equivalents

Cash equivalents are short-term, highly liquid investments that are both readily convertible to known amounts of cash, and so near their maturity that they present insignificant risk of change in value due to changes in interest rates. Generally, only investments with original maturities of three months or less qualify under that definition. U.S. Government securities and FCDAs with original maturities of three months or less, except for foreign currencies acquired under swap agreements with developing countries, are treated as cash equivalents.

The ESF invests a portion of its European Euro holdings through repurchase agreements in securities issued by, and backed by the full faith and credit of, the Federal Republic of Germany. As of September 30, 2001 and September 30, 2000 the amounts of repurchase agreements were approximately \$1.4 billion and \$1.2 billion respectively. These repurchase agreements are considered to be FCDA with original maturities of three months or less, which are treated as cash equivalents, as discussed above. Such investments are made by the Federal Reserve Bank of New York (FRBNY), as fiscal agent of the Treasury, in connection with the ESF's participation in such repurchase agreements. In this capacity, FRBNY enters into agreements under which German government securities are purchased from, and subsequently resold to, private counterparties. Such transactions are settled through a tri-party agent, Deutsche Bank. The securities are held by Deutsche Bank for FRBNY pending resale and are not transferred back to a private counterparty upon resale until cash has been received. The FRBNY instructs the tri-party agent on matters related to these investments. The amounts held as of September 30, 2001 and September 30, 2000 were as follows:

Note 2. Cash and Cash Equivalents (continued)

September 30 (In Thousands)	2001	2000
Cash and Cash Equivalents:		
U. S. Government Securities	\$10,013,968	\$11,028,570
FCDAs:		
European Euro Japanese Yen Total Foreign Currency	\$ 3,592,281 \$ 2,267,267	\$ 3,205,979 \$ 5,298,391
Denominated Assets	\$ 5,859,548	\$ 8,504,370
Total Cash and Cash Equivalents	\$15,873,516	\$19,532,940

Note 3. Other FCDAs

Operations of the ESF result in the holding of various foreign currencies. The ESF normally invests its foreign currency holdings in interest bearing assets issued by or held through foreign governments or monetary authorities. Other FCDAs are assets with maturities greater than three months, and include foreign currencies acquired under swap agreements with various countries (See Note 7).

September 30 (In Thousands)	2001	2000	
Other FCDAs:			
European Euro	\$ 2,588,699	\$ 2,404,450	
Total Other FCDAs	\$ 2,588,699	\$ 2,404,450	

Note 4. Special Drawing Rights (SDR)

The SDR is an international reserve asset created by the International Monetary Fund (IMF). It was created as a supplement to existing reserve assets, and on several occasions SDRs have been allocated by the IMF to members participating in the IMF's SDR department. Its value as a reserve asset derives, essentially, from the commitments of participants to hold and accept SDRs and to honor various obligations connected with its proper functioning as a reserve asset.

Pursuant to the Special Drawing Act of 1968, as amended, SDRs allocated to or otherwise acquired by the United States are resources of ESF. SDRs, once allocated, are permanent resources unless:

Note 4. Special Drawing Rights (SDR) (Continued)

- a. they are canceled by an 85 percent majority decision of the total voting power of the Board of Governor's the IMF;
- b. the SDR Department of the IMF is liquidated;
- c. the IMF is liquidated; or
- d. the United States chooses to withdraw from the IMF or terminate its participation in the SDR Department.

Except for the payment of interest and charges on SDR allocations to the United States, the payment of the ESF's liability related to the SDR allocations is conditional on events listed above, in which the United States has a substantial or controlling voice. Allocations of SDRs were made on January 1, 1970, 1971, 1972, 1979, 1980 and 1981. Since 1981, the IMF has made no further allocations of SDRs. As of September 30, 2001 and September 30, 2000, the amounts of SDR allocations was the equivalent of \$6.3 billion and \$6.4 billion, respectively.

On a daily basis, the IMF calculates the value of the SDR using the market value, in terms of the U.S. dollar, of each of the four freely usable weighted currencies, as defined by the IMF. These currencies are the U.S. dollar, the European Euro (components consist of the French and German weights), the Japanese yen, and the pound sterling. The ESF's SDR holdings and allocations are revalued monthly based on the SDR valuation rate calculated by the IMF, and an unrealized gain or loss on revaluation is recognized.

During Fiscal Years (FY) 2001 and 2000, the ESF purchased, at the prevailing rates, \$491.7 million and \$577.6 million, respectively, equivalent of SDRs received from the IMF by the General Fund of the U.S. Government as remuneration (interest) on the U.S. reserve position in the IMF, and paid the General Fund \$3.0 million and \$6.0 million in fiscal years 2001 and 2000, respectively, in interest on dollars due the General Fund in return for SDRs received as remuneration. ESF did not directly sell SDRs to or purchase SDRs from participating members during FY 2001 or FY2000.

The following charts reflect the actual activity (i.e. amounts paid and received) related to SDRs during fiscal years 2001 and 2000.

Note 5. Investment Securities, Held to Maturity

In accordance with SFAS 115, "Accounting for Certain Investments in Debt and Equity Securities", securities that the ESF has both the positive intent and ability to hold to maturity are classified as investment securities held to maturity and carried at historical cost, adjusted for amortization of premiums and accretion of discounts. Interest on investment securities, amortization of premiums, and accretion of discounts are reported in interest on investment securities.

The following schedule shows investment securities at their amortized cost and by year of maturity as of September 30, 2001 and September 30, 2000. The only investment securities maturing after one year are the German bonds. There are no securities maturing after ten years.

Note 5. Investment Securities, Held to Maturity (Continued)

Note 6. Certificates Issued to Federal Reserve Banks

The Special Drawing Rights Act of 1968 authorized the Secretary of the Treasury to issue certificates, not to exceed the value of SDR holdings, to the Federal Reserve Bank in return for interest free dollar amounts equal to the face value of certificates issued (SDR monetization). The certificates may be issued for the purpose of financing the acquisition of SDRs from other countries or to provide resources for financing other ESF operations. Certificates issued are to be redeemed by ESF at such times and in such amounts as the Secretary of the Treasury may determine (SDR demonetization).

As of September 30, 2001 and September 30, 2000 the amounts of SDR certificates outstanding were \$2.2 billion and \$3.2 billion respectively, while the value of SDR holdings was \$10.9 billion and \$10.3 billion, for a difference of \$8.7 billion and \$7.1 billion respectively. During fiscal years 2001 and 2000 ESF transacted no monetizations. Also, during fiscal years 2001 and 2000, ESF transacted \$1 billion and \$4.0 billion demonetizations respectively.

Note 7. Foreign Currency Agreements and Guarantees

Foreign Currency Agreements represent swap agreements between Treasury and various countries that provide for drawings of dollars by those countries and/or drawings of foreign currencies by Treasury. The Treasury enters into these agreements through the ESF. Any balances the ESF may hold under such agreements are held for other than trading purposes and are reflected as Other Foreign Currency Denominated Assets in the Statement of Financial Position (See Note 3). The ESF is exposed to credit risk on foreign currency agreements in the event of default by counterparties to the extent of any amounts that have been recorded in the Statement of Financial Position. Market risk occurs as a result of fluctuations in currency exchange rates. The ESF is not exposed to market risk on foreign currency agreements that could occur as a result of fluctuations in currency exchange rates. Under these agreements, the

ESF will receive an agreed upon amount in dollars upon maturity regardless of currency fluctuations.

ESF enters into guarantee agreements which represent commitments by Treasury with lenders and/or investors that provide for repayment of all or part of the principal and/or interest on certain debt obligations of a borrower and/or issuer. ESF is exposed to credit risk on guarantees in the event it has to honor a guarantee and is unable to recover from the borrower amounts advanced under the guarantee.

ESF's foreign currency agreements and guarantees consisted of the following at September 30, 2001 and September 30, 2000:

- a. In April 1994, Treasury signed the North American Framework Agreement, which includes an Exchange Stabilization Agreement (ESA), with Mexico. The ESA provides for a \$3 billion standing swap line. The amounts and terms (including the assured source of repayment) of any new borrowings under the North American Framework Agreement would need to be negotiated. There were no drawings outstanding on these agreements as of September 30, 2001 and 2000. In December 2001, the Treasury and FRB renewed this agreement for another year to December 2002.
- b. On November 6, 1998, Secretary Rubin agreed the United States would commit to guarantee up to \$5 billion from the ESF to participate in a multilateral guarantee of a \$13.2 billion Bank for International Settlement (BIS) Credit Facility for Brazil. During FY 1999, Brazil made two drawings on the Bank of International Settlement's credit facility partially guaranteed by ESF. These drawings were made in December 1998 and April 1999 for \$4.2 billion and \$4.5 billion respectively and the ESF' shares of the guarantee were \$1.6 billion and 1.7 billion respectively. In this regard, the Treasury Department authorized the Federal Reserve Bank of New York to invest ESF's share of the guarantee in Treasury non marketable securities on behalf of ESF on those dates. On June 18, 1999, Brazil repaid approximately 30% of the December 1998 drawing and ESF was paid a commission of \$35.5 million. On October 12, 1999 Brazil also repaid approximately 30 % of the April 1999 drawing and ESF received a commission of \$43.8 million. The balance of the December 1998 drawing was repaid in December 1999 and ESF received a commission of \$30.9 million. Also, in April 2000, Brazil repaid the balance of its April 1999 drawings and ESF received a commission of \$30.1 million. With this last payment, the credit facility granted to Brazil by BIS and partially guaranteed by ESF was terminated. Accordingly, ESF had no loan guarantee obligations on BIS credit facility to Brazil as of September 30, 2001 and September 30, 2000.
